# UI Prototype Document

## 1. Introduction

The UI Prototype Document provides a first glimpse of information about UI in this application. The purpose of this document is to revise and summarize pages that are essential for this application. On each page, the document describes the feature and the event button on that page to explain more detail about the structure of the website and features in this application.

## 2. UI Overview

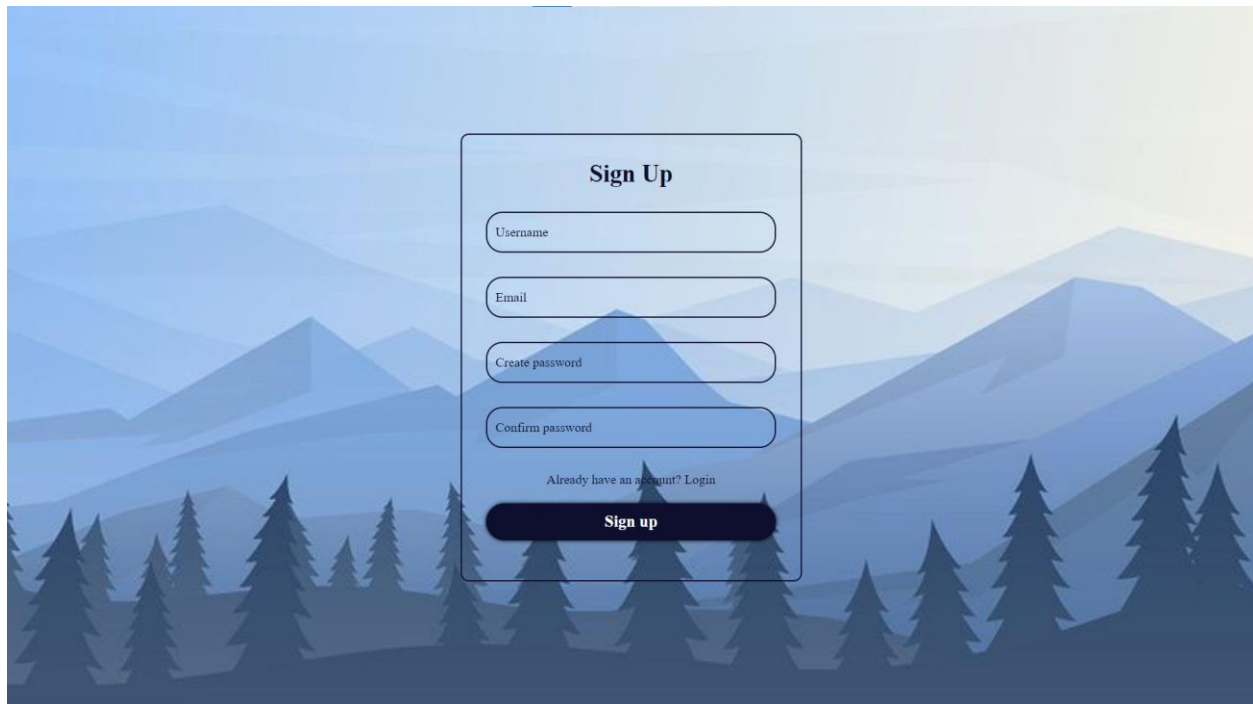

### 2.1 Login page

Login page is a page helping users access the service of this application. Users must input their username and password that they signed up for an account on booklovers's website before. After that, users click on the Login button and it will redirect to the home page. The below of Login are button access to forget password features and sign-up page. Some other features in this page are checking that if username does not exist, Login page will display notification - "Username does not exist" and checking that if password is incorrect, Login page will display notification - "Password incorrect".

Book Lovers	Version: 5.0

## 2.2 Sign-up page

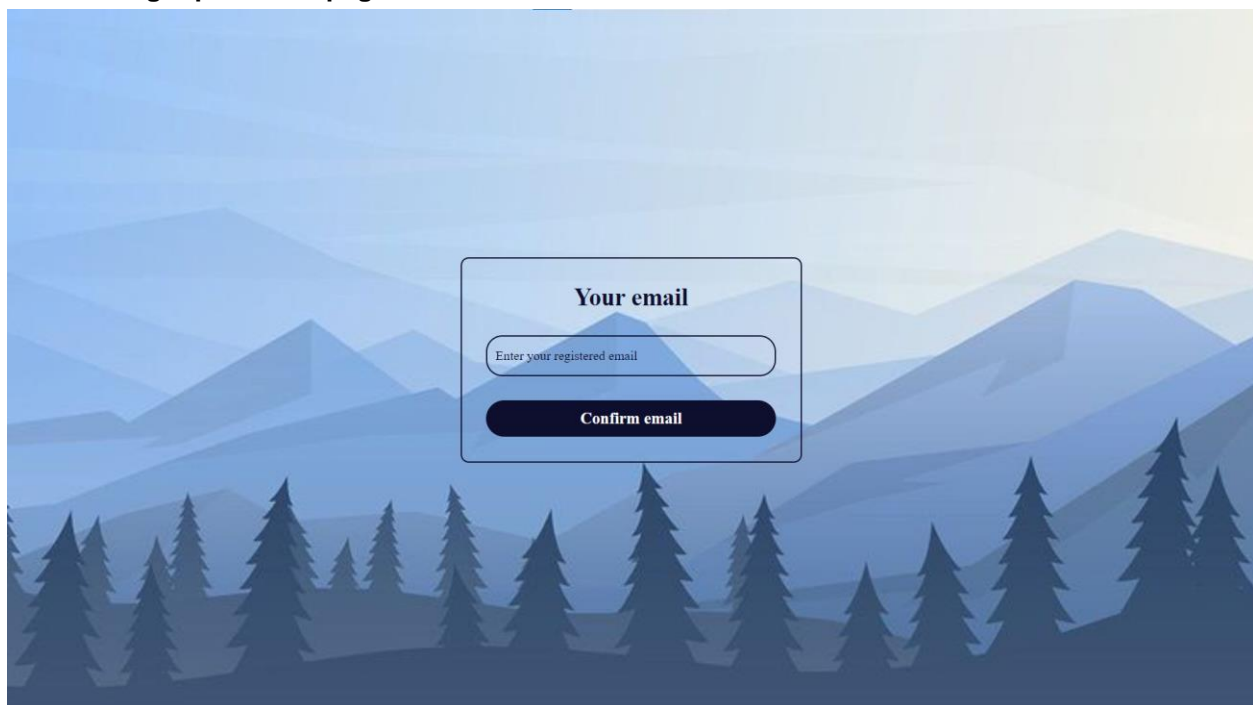

The Sign Up form is centered on a background of a mountain range with evergreen trees. The form is a white rectangle with rounded corners. It contains the following elements:

- Sign Up**: Title of the form.
- Username**: Input field for the username.
- Email**: Input field for the email address.
- Create password**: Input field for the new password.
- Confirm password**: Input field for the password confirmation.
- Already have an account? Login**: Link to the login page.
- Sign up**: A dark blue button with white text to submit the form.

If a user has not had an account yet, the user can register an account by typing username, email, and the password which he wants to create. System will check if the user is existed, user is redirected to login page, if the user is not existed, system will check the two passwords and if all the requirements are correct, user's information will be added to database and redirected to login page.

## 2.3 Forgot password page

The Your email form is centered on the same mountain landscape background. The form is a white rectangle with rounded corners. It contains the following elements:

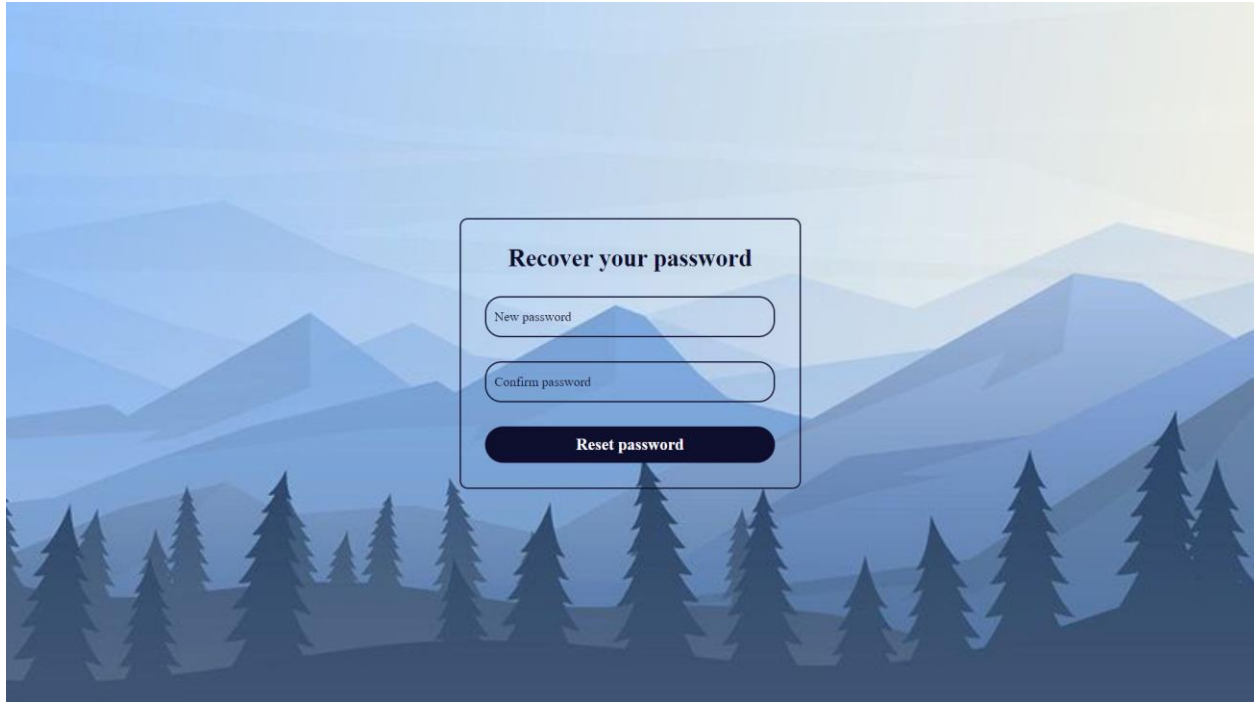

- Your email**: Title of the form.
- Enter your registered email**: Input field for the user's registered email address.
- Confirm email**: A dark blue button with white text to submit the form.

While a user forgot his password which he has registered, he can choose the option called "Forgot your password".

Book Lovers	Version: 5.0

<document identifier>	

The system will require the user to input his registered email and check if this email exists or not. If this email is not registered, the system will notify the user and redirect him back to the login page. In contrast, the user will be redirected to OTP page to confirm if this email is his

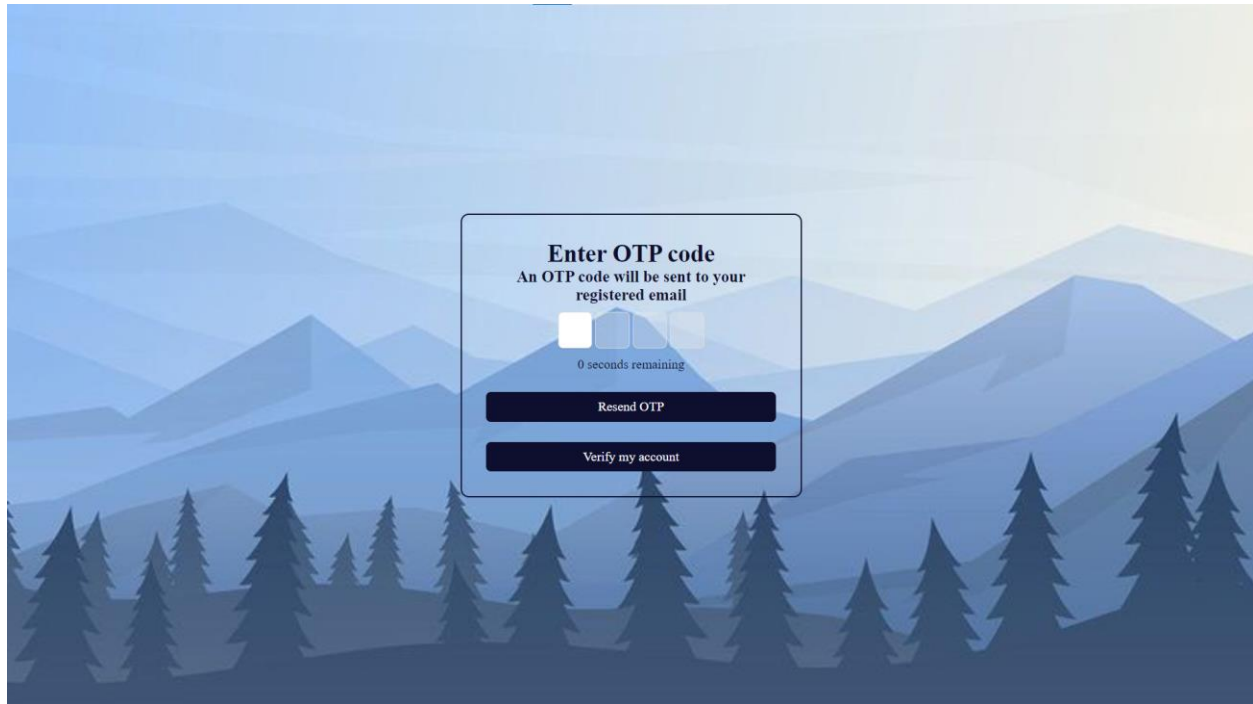

## 2.4 Recover password page

After the user confirms that the email is his, the user will be asked to enter his new password and confirm that password again. If the two passwords are not the same, he needs to confirm them again, and if the two passwords are the same, system will update his password in database and redirect him back to the login page

## 2.5 OTP page

After the user has entered the valid email for recovery. Then the user will be sent the email containing the OTP for resetting the password and be redirected to this OTP page where the user is prompted to enter the OTP code sent through the email. There is a 60-second timer that when it runs out, enables the user to press and a new OTP will be resent to the user in case the first email does not come through. If the user type in the valid OTP then the user will be redirected to the password reset page where the user will be asked to enter the new password. If the entered OTP is wrong then the page will flash an error message 'Wrong OTP entered'.

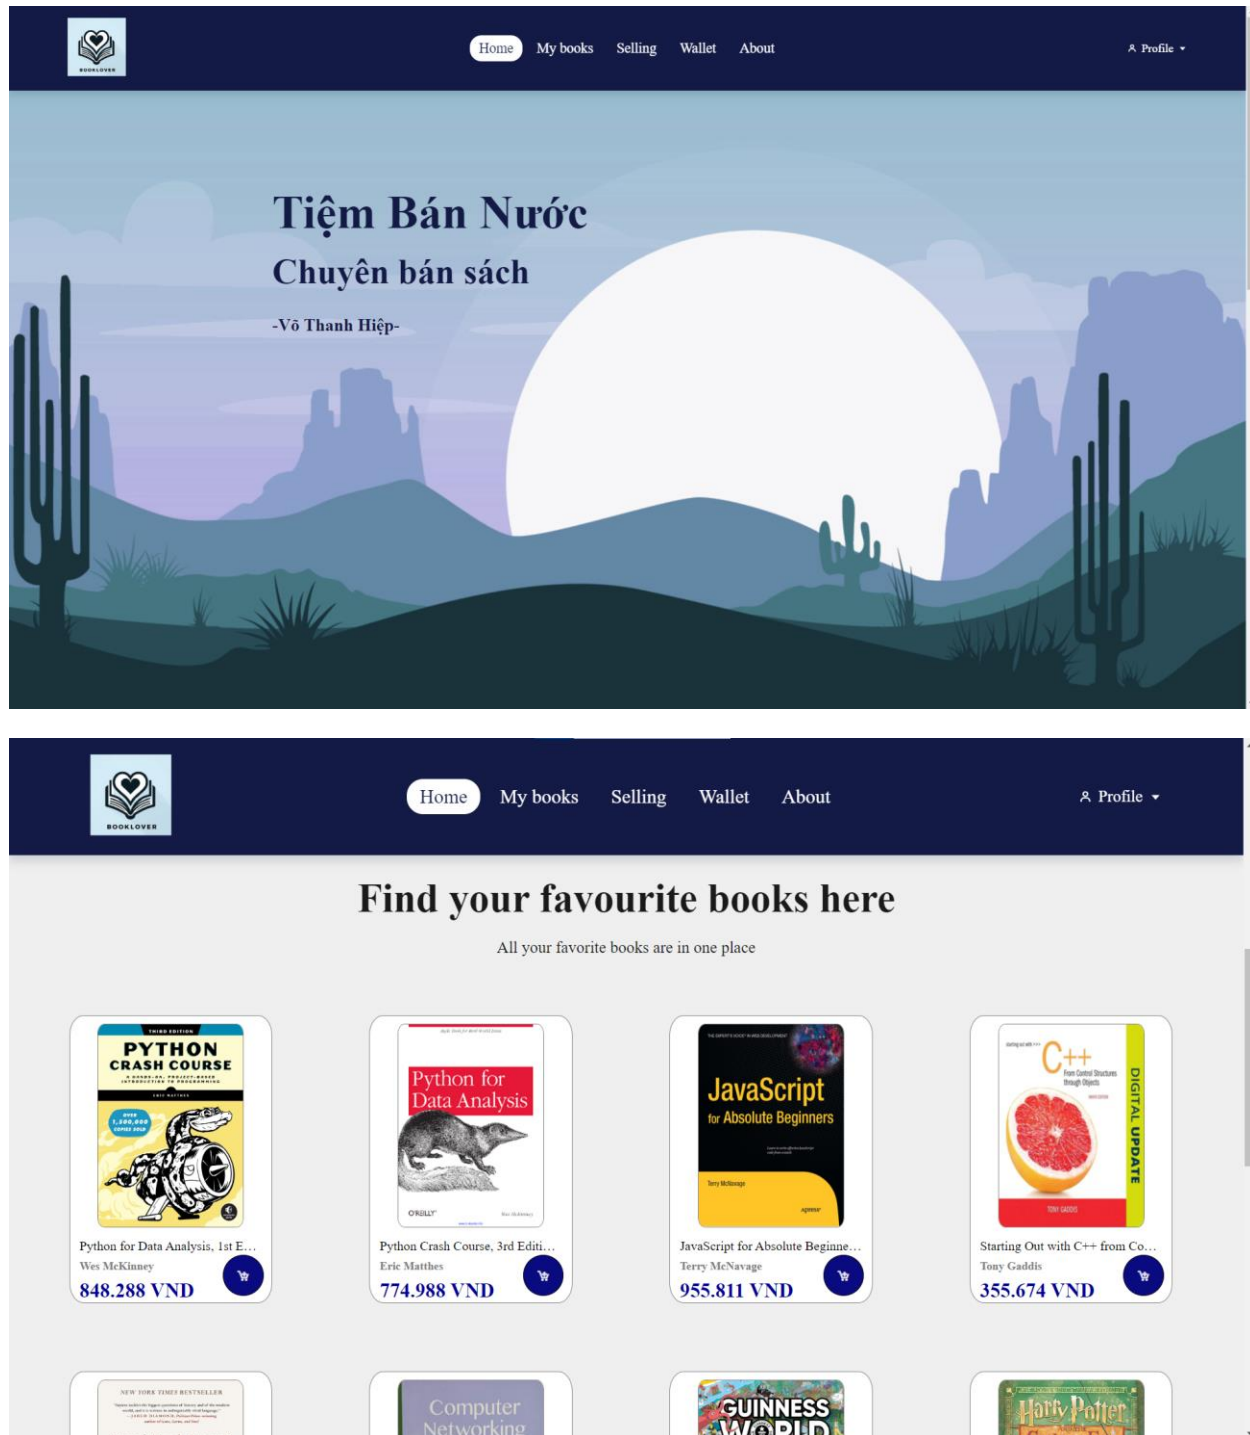

## 2.6 Navigation bar

On the navigation bar, it will illustrate five buttons: Home, My books, Selling, Wallet, About. Users can interact with another page by clicking on a button. Next to the profile, it has an arrow button, when you click on it, it will show your username, email, and wallet. Beside, it will show the button Edit my profile and Log out. If clicking on the button Edit my profile, it will move to the Edit profile page. If you click on the button Log out, you will be redirected to the Login page.
